# OFFSHORE
## Staff Augmentation

Maintaining an appropriately skilled IT department is one of the most important - and costly - components of any organization. Ensuring availability of necessary technical and niche skills for critical short-term projects can mean having these costly resources sit idle during periods of low demand. To control costs it is important that efficiency and flexibility are at the core of the engagement model so that projects can be delivered on increasingly tighter budgets without compromising quality. IT staff augmentation seems to be an extension of the "right-sizing" movement and remains one of the most demanding and vigorous marketplaces in the world.

# Benefits of Akidev's

## Offshore IT Staff Augmentation Services

We offer staff augmentation services across a wide variety of technical and functional skill sets, and maintain a bench of skilled resources ready to rapidly respond to shifting requirements. Our experienced team is ready to support strategic and tactical business needs. Whatever the client staff augmentation requirements, Akidev is ready to meet them.

### Cost Effectiveness:
Typical savings are 40-60% when compared to onshore rates. This provides clients with a mechanism to temporarily augment their resource base without breaking their budget.

### Time Efficient:
Our staff members will be dedicated to you and will have expertise and experience in desired technologies. They will work with you to complete projects within a specified time period and help you in meeting your business goals.

### Direct Access:
You will have direct access to these resources and you can directly assign work to them. Working with our resources would be exactly like working with your own employees.

### Flexibility:
Our India facilities are open 24/7, so resources can be available during your work day or around the clock as required. Additionally, the team size can ramp up and down depending on immediate needs so no one is idle and the client is never without required resources.

### Skills:
With extensive in-house expertise across technical and functional areas and access to a large resource pool in India, we can supply expertise in virtually any application, product, or function to meet your needs.

### IP Protection:
IP Protection: We offers expert knowledge transfer and assist in maximizing the security of your technology and proprietary information. Therefore all intellectual property or copyrights of the work done by our resources would remain with you.

# About

**Akidev** is one of Silicon Valley's leading services organizations providing technology consulting, management consulting, compliance consultingand outsourcing services - but our real strength comes from combining these services to address our clients' needs. Be it Web, Cloud or Mobile, we have competencies to deliver what is best for our clients. We don't classify ourselves as a company that pretends to be 'Cloud only' focused or 'Mobile only' focused or for that matter, any 'Latest-Buzzword only' focused. At Akidev, our clients come first. We have designed a business model to help our customers achieve their goals in the most efficient way.
